Missouri system universities to reform administrative structure; Park forms committee

Charles Kastner
News Writer

The University of Missouri system recently put a plan into action that suggests a reform of the administrative structures on the campuses across the system. In response to this plan, the University of Missouri-Rolla has set up the Administrative Restructuring Advisory Committee to discuss possible changes.

"It is my opinion that such a review should be taken periodically in any case," said Dr. John Park, the Chancellor of the University of Missouri-Rolla. "UMR has changed significantly in the last few years, and it is appropriate that the administrative structure reflect those changes."

Currently, the administrative authority on campus is held by the Board of Curators, with the University's faculty and staff involved to a lesser extent. The Advisory Committee would allow the faculty and staff to directly advise Chancellor Park concerning issues that are important to them.

The main reason for this is the make-

up of the Committee. The members of the organization include the Chancellor's Staff Group, one representative from each school from the Committee of Department Chairs, a faculty representative from the Academic Council, one faculty member from each of the campus' three schools, one staff member from the Staff Council, a student representative from Student Council, and one staff member apiece from Academic Affairs, Administrative Services, Student Affairs, and University Advancement.

"The topic [to be discussed by the Committee], administrative structure, is of primary importance to the faculty and staff," Dr. Park commented. "Students, of course, have an indirect interest in having a structure which is effective, efficient and meets their needs."

"As stated earlier, the Committee as it is now structured does have one student representative from Student Council. However, other observers are invited, and I intend to find an opportunity to discuss the recommendations of the Committee with student leadership before making final decisions."

When the Committee first convenes, probably in the second week of February, it will begin to discuss the administrative structure. Recommendations will be made to the administration that will hopefully make particular units more effective.

"I would hope that the Committee confines its attention to the overall administrative structure," said Dr. Park.

However, Dr. Park mentioned that other issues that have been raised for discussion include the development of a marketing structure which would coordinate efforts to strengthen student recruitment and the reputation of the University; consideration of another high-ranking university administrator, an increased attention to research, and increased communication between UMR and Fort Leonard Wood.

Dr. Park intends the committee to finish its discussions by the end of this semester, so that any changes to be carried out will be set into action in the somewhat near future.

Chancellor Park is organizing a committee to look at administrative changes at UMR. The University of Missouri system suggested reform for campuses across the system.

Manufacturing options presentation tomorrow

Connor Magee
MEEP

This coming Thursday, Jan. 27, beginning at 3 p.m. there will be a two hour presentation in ME 104 on proposed courses for the new MS and Manufacturing Engineering degrees in Manufacturing Engineering which will be offered for the first time this coming fall.

The interdisciplinary master's program would be coordinated by a Manufacturing Engineering executive committee.

That committee is already in place and consists of Dr. Frank Liou, professor of Mechanical Engineering, who serves as the committee chair; Dr. Venkat Allada, assistant professor of Engineering Management; Dr. Rajiv Mishra, assistant professor of Metallurgical Engineering; Dr. Anthony Okafor, associate professor of Mechanical Engineering; and Dr. Ming Leu, Keith and Pat Bailey Missouri Distinguished Professor of integrated product development and Manufacturing.

There will also be presentations on proposed courses for the existing manufacturing options offered for the

Bachelors of Science in Mechanical Engineering, Engineering Management and Metallurgical Engineering.

This presentation will give students a chance to learn more about new developments in Manufacturing Engineering and the opportunities available at UMR.

Faculty members will speak on the following proposed new courses; Sustained Product Design and Reverse Engineering, Micro-Electro Mechanical Systems, New Composite Manufacturing Laboratory and Course Development, Laboratory for Distance Learning, Enhancing Rapid Product Realization Curriculum at UMR, Materials for Manufacturing, Human Factors and Ergonomics Program Development, Enhancement of Manufacturing Processes and Adding Concurrent Engineering into the Introduction of Design.

There will also be a Demonstration session outside ME 104 from 2 p.m. until 5 p.m. Refreshments will be served.

For more information please contact the MEEP Management Assistant Connor Magee conor@umr.edu.

See Sports on page 5 for more

Not to be outdone, the Lady Miner basketball team recorded a record of their own Saturday versus Northwest Missouri State. The Lady Miners scored 100 points in their overtime victory and recorded 14 three point goals, most in school history and tied for the most by any MIAA conference team.

NEWSBRIEFS ON CAMPUS

UMR Orchestra needs instrumentalists

The University of Missouri-Rolla Symphony Orchestra is presently recruiting instrumentalists. The orchestra has traditionally consisted of a mix of UMR students and local musicians.

For more information about joining the University Symphony Orchestra, contact the orchestra's conductor, Joel Kramme, at (573) 341-4109, or e-mail him at jkramme@umr.edu. Kramme is an assistant professor of music at UMR. His office is located at 131 Castleman Hall on campus.

"We are in particular need this semester of violinists," says Kramme, "although other string players are welcome."

The University Symphony Orchestra will perform twice during the winter semester. The first performance is scheduled for 2 p.m. on April 30 in Leach Theater of Castleman Hall. Musical selections will include works by Johann Sebastian Bach, Franz Schubert and Wolfgang Amadeus Mozart.

The second performance, which will include the participation of the UMR University Choir, is scheduled for 2 p.m. on May 7 in Leach Theatre. This program will feature works by Randall Thompson and Franz Joseph Haydn.

Both upcoming concerts are free and open to the public.

Nominations sought for Staff Awards

The 2000 Staff Recognition Awards Committee is seeking nominations for the 2000 Staff Recognition Awards. Nominations are due by 4:30 p.m. Friday, Feb. 4. The nomination form was printed in the December issue of the W3 and will be

printed in the January issue of W3. The form can also be found on Staff Council's web page <http://www.umr.edu/~staffco> and may be completed and submitted electronically.

Nominations are being sought in the four UMR job categories: administrative/professional; paraprofessional; crafts/services; and clerical.

UMR physics department announces scholarships

Dr. Abdalla Obeidat, a graduate student in the physics department at the University of Missouri-Rolla, has received a one-year World Laboratory Scholarship from the International Centre for Scientific Culture World Laboratory in Switzerland. The scholarships are reserved for young scientists from developing countries who are studying under the direct supervision of established scientists.

Obeidat, from Jordan, will receive \$600 per month in assistance. He is conducting aerosol physics research under the direction of Dr. Gerald Wilemski, professor of physics and director of the Cloud and Aerosol Sciences Laboratory at UMR.

Joao Sosa, a freshman physics student at UMR, has also been awarded a scholarship. Sosa, from Shawnee Mission, Kan., recently received a one-year, renewable, \$2,000 minority scholarship from the American Physical Society. The award is based on academic achievement.

UMR Spring Film Series for January, February

The UMR Spring 2000 Film Festival has begun. The films will be screened on Tuesday nights at 7 p.m. in Leach Theater of Castleman Hall with the exception of Feb. 22 and 29

when the movies will be viewed in Miles Auditorium, of the Mechanical Engineering Building. This semester's films are as follows:

January 18 - RED VIOLIN
SAMUEL L. JACKSON. Directed by FRANCOIS GIRARD. The Red Violin traces the history of a legendary instrument across five countries and 300 years, from a workshop in the Italian city of Cremona to an auction of rare violins in modern-day Montreal. The violin turns up in Vienna, in the hands of a child prodigy. From there it passes to gypsies, and then, another century later, to master violinist Frederick Pope in Oxford. We next see the violin in Shanghai during the Cultural Revolution in 1968, where its very existence is threatened, along with the man who would protect it. Finally, the violin is played at an auction in New York City, where an American violinist, Charles Morris, faces a choice between the true nature of the instrument and the haunted instrument of 1999.

January 25 - LIMBO
Set in the rugged islands of South-eastern Alaska, Limbo is the dramatic tale of Joe Gesteau, a fisherman traumatized by an accident at sea years before. He becomes involved with a travelling lounge singer and her estranged daughter, as they try to reinvent themselves in American's last frontier. When Joe's fast-talking half-brother returns to town and asks Joe for a favor, the lives of the three characters are forever altered. R-1999.

February 1 - LOCK, STOCK, AND TWO SMOKING BARRELS
Set in the London underworld, this offbeat gangster comedy tells of a streetwise card shark named Eddie who walks into the biggest card game of his life, carrying a \$100,000 stake into which he and three buddies have invested their hard-earned cash. While Eddie is the sharpest on the circuit, the game is a set-up and he leaves owing Hatchet Harry half a

million. With only a week to raise the money, Eddie and his gang find themselves embroiled in a series of increasingly dangerous dealings. Meanwhile, Eddie's father can cancel the debt by handing over his bar - lock, stock and barrel - to his old adversary Harry. R-1999.

February 8 - RUN LOLA RUN
Winner of the Audience Award at Sundance and the highest grossing film in German history, this rapid-fire outlaw-couple romance combines MTV razzle-dazzle and film-noir fatalism. Lola, the rebellious daughter of a philandering banker, gets a frantic phone call from her headbanged boyfriend, who has lost the money entrusted to him in a drug deal. They have exactly twenty minutes to come up with 100,000 marks. Can they do it? The film provides three different answers to that question in the form of three alternative destinies that transpire when split-second differences in timing trigger major variations in the chain of cause and effect - not only for the main characters but also for various passersby whose paths cross Lola's in the course of her wild run. "I wanted the sheer, unadorned pleasure of speed," says director Tom Tykwer. R-1999.

February 15 - RKO 281
Coming to Hollywood as a celebrated boy genius featuring a spectacular career arc in New York including his "War of the Worlds" radio hoax, Orson Welles is stymied on the subject for his first film. After a dinner party at Hearst Castle, during which he has a verbal altercation with Hearst, Welles decides to do a movie about Hearst. It takes him some time to convince co-writer Herman Mankiewicz and the studio, but Welles eventually gets the script and the green light, keeping the subject very hush-hush with the press. When a rough cut is screened, Hearst gets wind of the movie's theme and begins a campaign to see that it is not only never publicly screened, but

destroyed. PG-13-1999.

February 22 - WEST BEIRUT
Approximately 150,000 people died in Lebanon's civil war, which lasted from 1975 to 1989, but surprisingly few films have been made about the conflict. Director Ziad Doueiri steps into the breach with West Beirut, a movie that captures the socio-political climate during the early part of the war with remarkable accuracy and subtlety, and without oversentimentalizing the subject. But this film is no history lesson. Doueiri is not out to document the tangled internal and regional issues that made the crisis so intractable. Instead, he zooms in on the texture of daily life in Beirut in 1975, when tensions finally erupted between Lebanon's Christian ruling class and the Muslim majority. In Arabic with English subtitles. PG-13-1999.

February 29 - AFTER LIFE

ARATA, ERIKA ODA
Directed by KORE-EDA HIROKAZU. A group of young, casually dressed staff members arrive for another day's work at what appears to be a drafty, antiquated high school. Some two dozen clients, ranging from a bubbly teenager to a dour salaryman to a serenely senile woman, check in. They are offered condolences on their recent deaths and told they each must select a treasured memory. It will be recreated on film, and they will then take that single recollection into eternity. This matter-of-fact approach is the basis of what is possibly the most convincing film ever made on the subject of the hereafter. In contrast to the pomposity and preciousness of subject of the hereafter. In contrast to the pomposity and preciousness of most celestial cinema, After Life is a fascinating commentary on the link between movies and memory. In Japanese with English subtitles. PG-13-1999.

The Missouri Miner

The Missouri Miner is a publication of the students of the University of Missouri - Rolla. It is distributed each Wednesday in Rolla, Missouri and features activities of the students of UMR. The Missouri Miner is also online at <http://www.umr.edu/~miner>.

The Missouri Miner encourages comments from its readers and will attempt to print all responsible letters and editorial material received. All submissions must have a name, student ID number, and phone number for verification. Names may be withheld upon request.

The Missouri Miner is operated by the students of UMR and the opinions expressed in it do not necessarily reflect those of the university, faculty, or student body.

All articles, features, photographs, and illustrations published are the property of the Missouri Miner and may not be reproduced or published without written permission.

Submissions for publication must be in our mail box in 113 University Center-West by 3:30 p.m. on the Thursday before publication. Submissions will be accepted through e-mail at miner@umr.edu. The Missouri Miner reserves the right to edit all submissions for style, grammar, punctuation, spelling, length, and matters of good taste.

Talks begin on the issue of gene-altered foods

John Burgess

L.A. Times/Washington Post

Delegates from 140 countries gather in Montreal this week to try to write a rule book to govern the world's ever-expanding trade in genetically altered organisms, grains, bacteria, farm animals, with life codes that have been rearranged in hopes of improving on nature's work.

The official focus will be safety: whether these creations could accidentally cause illness or harm to the environment. But underlying much of the talk will be the issue of money and jobs.

The United States and a handful of other countries that pioneered the genetically modified organisms (GMOs) will press for relatively loose control of the trade. Countries that fear their farmers will lose out by not producing such high-yield crops will seek stronger standards.

Some of the protesters who disrupted the meeting of the World Trade Organization in Seattle late last year were angry about gene-altered foods. The questions are so contentious that a gathering in Cartagena, Colombia, last year ended in disarray, with the United States and its allies against most of the world.

In Montreal, about 300 opponents of genetically modified food braved winds and sub-zero temperatures Saturday in a peaceful march near the meeting site. Starting Monday, the delegates will try again to reach agreement on a Biosafety Protocol.

The outcome could have a big impact for U.S. farmers, who last year rang up sales of nearly \$50 billion with the outside world. More than one-third of all cotton, corn and soybeans planted in the United States last year were bio-engineered varieties. Big yields from low-cost bio-engineered products give American farmers an advantage and the Clinton administration is anxious to keep their markets open.

"The world as a whole stands to benefit from a sound framework for management of bio-engineered products," said David Sandalow, assistant secretary of state for oceans, environment and science and U.S. delegation chief. "The world as a whole stands to lose if we impose draconian rules that cost billions of dollars, for little benefit."

Creators of the products describe them as crucial to feeding an ever-expanding global population (six billion and counting), lowering malnutrition and taming now-incurable diseases.

With proper testing and regulation, biotechnology products are safe, they contend, adding that the

world has no choice but to adopt them.

Last week, for example, researchers announced they had created a new "golden rice," that contains transplanted genes to combat vitamin A deficiencies that can cause blindness in millions of children around the globe.

In the 1990s, a backlash emerged, led by consumer groups, politicians and environmentalists who say the products are being rushed to market without adequate testing. What, they ask, if there are hidden health risks to humans? What if crops modified to be pest-resistant end up creating destructive strains of "super weeds" in the wild? A report last year that corn altered to kill pests also killed popular monarch butterflies aided naysayers.

Western Europe is the world's stronghold for this thinking. While U.S. officials argue that there is no real evidence that the products are dangerous, Europeans say there is no real proof that they are safe and have blocked entry of new products.

A key issue on the table in Montreal is whether and how countries should be notified if GMO products are being shipped to their shores.

The Montreal talks grew out of the 1992 Earth Summit in Rio de Janeiro, where countries agreed to regulate trade in "living modified organisms" to avoid harm to health or the environment. Though the Clinton administration supports the agreement, it was never ratified by the Senate, so the United States will be in Montreal with observer status. But as the world's largest farm good exporter, what it says is closely listened to.

UMR Crime Blotter

01/15/00 at 2:30 p.m.: UMR Police investigate property damage to two vehicles in TJ residence hall parking lot. One had stereo equipment and accessories missing and the other just had a broken window. Owners contacted and case continues.

01/15/00 at 9:30 p.m.: UMR Police investigate a disturbance at a residence hall between two students. Same was resolved without criminal charges being filed. Report copies will be forwarded to Student Affairs.

01/18/00 at 12:45 p.m.: UMR Police notified by student victim of theft of a cellular phone from his truck. Same was taken sometime after 01-13-00. Continuing.

01/18/00 at 5:00 p.m.: UMR Police notified by concerned parent unable to locate her daughter, a student on campus. The student was located at a friend's house by 7:00 p.m. this date.

01/18/00 at 8:30 p.m.: UMR Police check on burning smell in Chemistry Dept and find numerous burned matches and matchbooks in a trash can. Investigation initiated.

01/18/00 at 11:30 p.m.: UMR Police contact fraternity president at his residence and establish that the matches from the previous case were part of an experiment they performed during their meeting. Information passed on to Chemistry Department.

01/19/00 at 10:30 a.m.: UMR Police are contacted by a student who reported her wallet was stolen from her bookbag on 01-18-00 while it was in her unsecure vehicle parked in a campus lot. Investigation initiated.

01/19/00 at 1:40 p.m.: UMR Police respond to report of an elderly relative of a student who had fallen on campus. Same was finally convinced to go to PCRCM by ambulance and was discovered to have a broken hip. Continuing.

The Missouri Miner

January 26, 2000

Letter to the Editor:

Student Daycare Needed, Rally to take place January 31

As married students with a two-year old daughter, my husband and I have dealt with many challenges to finishing our education. Our major challenge has been to find safe, reliable and affordable day care for our daughter while we attend classes. Because of our personal experience, we have decided to pursue the possibility of establishing a campus-based child-care center at UMR.

Most non-traditional students will agree that there is a great need for childcare on campus. The article in last week's issue of the Miner was just another example of the barriers that exist for married students trying to continue their education. This semester I called every daycare in the Rolla and St. James area only to find that most of the day care centers want only to enroll children on a full-time basis. There was only one opening for my daughter in the area and I was obliged to take that. I had no other choice.

A campus-based childcare center would be a recruitment tool for the university to use in drawing non-traditional students. Right now, UMR is the only school in the UM system without some kind of childcare facility. How many students with small children may decide which university to attend based on the availability of a campus based childcare center?

We do not envision a center that would be exclusively for students. The center we have in mind would also be open to faculty and staff. Fees would be based on income so those who could afford to pay the full fee would help to subsidize the center for those who cannot afford to pay as much. Students would be able to apply for childcare subsidies to help defray their costs. We are hoping that grants and donations will help us to purchase the equipment needed to have a child care facility on campus so that student fees would not be impacted.

If you can lend your support to this effort, please attend a rally on Monday January 31, 2000 at 2 p.m. in Centennial Hall, UCE. Whether you have a child or not, I urge you to come and support this issue and tell all of your friends! If you have any questions or would like to get involved please contact me at keller@umr.edu.

Sincerely, Melissa Laycock

'Internet intoxication' defense does not hold water

By Eric Andraos

U-Wire

(U-WIRE) COLLEGE STATION, Texas --

Intoxication. The word itself brings to mind small, crowded spaces on Northgate, a sudden fear of police officers and a close relationship with a porcelain fixture in the bathroom. In short, one usually pictures this altered state in association with alcohol. Florida lawyer Ellis Rubin, however, associates it with something else -- the Internet.

Rubin is the lawyer for 18-year-old Michael Campbell of Cape Coral, Fla., who is awaiting trial on felony charges of knowingly transmitting a threatening message across state lines. Last December, as Campbell participated in an America Online chat room, he sent the message "I need to finish what begun and if you go I don't want your blood on my hands" to Columbine High School student Erin Walton, warning her not to attend school the next day. Campbell's warning implied that he was planning to add to the list of 13 murders that two Columbine students committed at the school in April. Walton did not attend school the following day, and she was not the only one. Columbine officials shut down the high school two days early for winter break due to the threatening message. Campbell recently apologized, calling it a "stupid, stupid prank." Ellis Rubin plans to use an affirmative defense he calls "Internet intoxication" to defend that "stupid, stupid prank." Rubin claims in Campbell's defense that the teen was so addicted to the Internet that he was operating out of a "virtual world" at the time he made the threat, and therefore could not be held responsible for his actions. Creative defenses like this one show up previously in Rubin's repertoire. The first example was in 1977, when Rubin claimed "television intoxication" in defense of another Florida teen. Rubin said that 15-year-old Ronny Zamora had been warped by the violence he watched on television, causing him to murder his 82-year-old neighbor. Zamora was eventually convicted.

In 1991, Rubin represented a woman charged with prostitution, defending her with a claim that she was suffering from Prozac-induced nymphomania. He said that her prostitution was a form of therapy for her condition, as her husband was impotent. She eventually pled guilty to the charges.

With this latest case, Rubin has simply updated his "intoxication" defense for the 21st century. Under the influence of "Internet intoxication," Campbell became more than just a teenager causing trouble. Instead, he was drunk on the Internet. He was helpless in its grasp; ensnared in its trap.

More likely, Campbell was wrapped up in its invisibility.

The Internet continues to offer increasing latitude to those who wish to discard their physical identities and adopt an alternate personality (or personalities). In a chat room, no one can be sure of anyone's true identity. Lies are difficult to detect in the online world, as most human senses are numbed by the presence of only a screen name and a string of words that serve as conversation.

Campbell, like so many others who spend time chatting online, took advantage of this invisibility when he threatened Walton. Even if he was joking, he took his anonymity to an extreme--an extreme that cannot be tolerated. Role-playing on the Internet might be all fun and games for teens like Campbell, but it still carries the responsibility of respecting others and respecting the law. Do words mean something different on the Internet? It is an ethical question that begs an answer, and Rubin seems to think the answer is yes.

Rubin and his client are claiming that the Internet is at fault for what amounts to a simple case of very poor judgment. However, Rubin might run into a roadblock with this new creative defense.

Intoxication can be defined as either inebriation or an excited state of delirium. Campbell was not physically inebriated, and the only delirium he was suffering from was the idea that he could make such a threat without getting in trouble. Intoxication is going to be hard to justify.

In a Reuters article, former Denver prosecutor Craig Silverman said, "You'd have to say that his computer slipped him a Mickey."

In addition, with a general intent crime like Campbell's, intoxication, even in the standard alcohol-related definition, cannot legally stand on its own as an affirmative defense.

However, if Rubin uses the concept of "hypnosis" in combination with "intoxication," his defense may be more viable. If Rubin can prove that Campbell was in a state of Internet-induced hypnosis, his suggested intoxication may be seen as involuntary. Campbell's defense would stand legitimate, and America's technology buffs would find themselves with a new catch-phrase.

In light of all this hype about the intoxicating Internet, maybe Northgate bars will start selling Internet instead of alcohol. Since there is no such thing as an "Internet belly," the change could be quite popular. Then again, there used to be no such thing as "Internet intoxication," either. Guess the side effects could show up at any time.

The Missouri Miner

Page 5

Women's basketball defeats NMSU in OT; look to Washburn

Eric Harris prepares to release a free throw during the Miner's game against Lincoln on Dec. 8. The Miners are now 5-8 overall and 0-6 in MIAA action. The men's next game is Saturday night at 7:45 against Washburn. photo by Brandon Belvin

Antone Smith
Sports Writer

The Lady Miners (3-10,1-4) had two more conference games to play this week and were looking to break their losing streak of four games. They faced off against Missouri Western (9-4,3-2) this past Wednesday at home and went on the road to play Northwest Missouri State (4-10,0-6) on Saturday.

Though Missouri Western lost a lot of their high scorers from last season, they have thus far managed to put together a good season. This is mainly due to their scoring defense, which is ranked third in the Mid-America Intercollegiate Athletic Association.

The Lady Griffons came into Wednesday's game leading the series 7-6. The Lady Griffons were set out to extend their lead as they outscored the Lady Miners 35-12 in the first half. The women managed to get their act together during halftime and came out to shoot 67% from the field and cut the Lady Griffons lead from 23 points to eight points. The Lady Griffons who only shot 20% from the field for the second half, managed to hold on and defeat the Lady Miners 64-50. This gave the Lady Griffons their third win in a row and moved the Lady Miners into a five-game losing

streak.

"This loss left everyone trying to find out what they could do for the team. We were looking for what was missing," freshman forward Christy Lane said.

The women did not have to look hard for what was missing in their next game. The Northwest Bearcats have been struggling all season.

"The team's confidence was up going into the game because Northwest hasn't won a game all year and we feel that we played a good game [this past Wednesday] against Missouri Western," Lane said.

The Lady Miners shot 44% from the field for the first half and went into halftime up 46-40. Then, despite the Lady Miners shooting 42% from the field for the second half, the Lady Bearcats outscored the Lady Miners 36-42 in the second half taking the game into overtime. The Lady Min-

ers would then beat the Lady Bearcats 100-90 in one overtime.

The Lady Miners ended the night with five ladies in double figures for points. Lane tallied 27, Sarah Badsy had 17, Jamie Schroetlin was close behind with 16, Eriaka Phillips put 11 on the board and Amy Milliken scored 10. Three Lady Miner shot 50% or better from three-point land with Lane being 5/8, Phillips 3-5 and Badsy 3/6. The Lady Miners also tied the MIAA record and set a new school record with 14 three-pointers.

But, what was so different about this game? What was done differently? "Playing more as a team and wanting it more than the other team," is the answer given by Lane.

They will be playing Truman State this Wednesday in Kirksville, Mo. at 7:45 p.m. and Washburn this Saturday at home in Rolla at the Multi-Purpose building at 5:45 p.m.

Mizzou defeats swimming, Wash. U Invitational next

Tera McCaffery
Sports Writer

The University of Missouri - Rolla men's swim team stayed busy over the semester break. While others were spending time with family and friends the men's swim team traveled down to Florida for their yearly team camp.

"Practices were really hard in Florida, but we had the team there so we could go to the beach and relax between practices," said Vanja Dezelic. "Right now we are really tired since we are still having difficult practices and we really do not have much time off."

After a tough week in Florida the men returned to Rolla tired, but with their sights set on conference at

the end of the season.

"The next few weeks of meets are really just to get us ready for the conference meet that is in a month," said senior Steve Caruso. "Conference is the biggest meet of the season, only after nationals and anything before that is basically in preparation for it."

The Miner men did not get an easy meet for their first meet of the season. Last weekend the men traveled to Columbia, Mo. to take on the Tigers of the University of Missouri-Columbia. The National Collegiate Athletic Association Division I Tigers at the time had a dual meet record of 5-1 and were well rested to take on the Miners.

The Tigers took no time establishing their dominance over the

smaller Division II Miners. The first event of the day the Tigers took the top two spots and their top spot set a new pool record, one of four that would be set that day. The first team in for the Miners took third place with a time of 3:33.81. The time was well off of the Miners top time of the season of 3:26.93.

The Miners got a lift in the second event of the day as Dezelic would take second in the 1000-yard freestyle in a time of 10:11.46, only nine seconds off of his best time of the season, a time which was set after which he had rested much more.

The Miners continued to get good swims in the next event the 200-yard freestyle. Despite putting up another second place finish senior David Nurre posted a time only four seconds slower than his rested time.

In the next event the Tigers once again showed how rested they were as Tiger Aaron Lo would come through to post the second pool record of the day and the second fastest time in MU history. Dave Belleville, who is ranked second in the Division II 50-free, came through to take second place once more for the Miners in a time of 21.53, one of the best times for the Miners this season.

The Miners got another excellent swim in the 200-yard individual

medley from freshman Ben Karstens. Karstens posted a time of 2:01.35, only two seconds off his best time, which was good for a fourth place finish in a field of tough Tiger swimmers.

In the next event, the 200-yard butterfly, the Tigers once again set a new pool record, the third of the day. Despite the swim of Tiger Racu Miclaus the Miners took both second and third. Matt Scott, ranked seventh in the 100-fly, took second with a time of 1:57.83 and Caruso, ranked sixth in the 100 and 200-fly, took third with a time of 1:58.67.

Lo, who had set the pool record in the 50-freestyle, came through again for the Tigers in the 100-freestyle to take first. The Miners got their fifth second of the day from Belleville when he set a new personal best for the year with a time of 46.62.

The Tigers would set their last pool record of the day in the 200-yard backstroke making it their fourth new record of the day. Karstens came in in a time of 1:59.84, once again close to his best of the year.

The Miners would get their only first place individual finish of the day in the 200-yard breaststroke. Senior Bruno Amizic, who is ranked first in the Division II in the 100-yard

breaststroke and the second best in the 200, set a time of 2:08.73 to top all of the Tiger swimmers. Freshman Sean Garcea would come in with a time of 2:15.59.

The Miners would finish the meet on a high note as John Reiter, Josh Jolly, Caruso and Dezelic would come through in the 400-yard freestyle relay to take first place in a time of 3:10.31 just four seconds off of their best time of the season. Before this meet the Miners were ranked second in the nation in Division II in the 400-freestyle relay.

Despite losing the meet 122 to 75 the Miners had strong swims from almost all swimmers even though they came into the meet tired after a long off period of tough practices.

"MU swam really fast set four pool record and just there is the fact that they are a Division I school. We got beat, but we all swam really well. The Tigers just had a really good meet," Nurre said.

The Miners are now getting ready for their first invitational of the season in St. Louis at Washington University next week. The Miners will then get set for their second and last home meet of the year the following weekend against Truman State and Southwest Missouri State at the Miner Natatorium at 6 p.m. on Feb. 4.

Men's Basketball loses to Mo. Western, now 0-6 in MIAA, worst record in 31 years

Antone Smith
Sports Writer

The Miners (5-7, 0-5) took to the court this past Wednesday to play a conference game against 23rd-ranked Missouri Western (12-2, 3-2) and this past Saturday to play Northwest Missouri State (10-3, 2-3).

Missouri Western has beaten the Miners the two times that they have faced each other and holds an 8-4 lead in the series between these two teams. The Griffons lost two in a row then bounced back last week to slide by Northwest Missouri State 77-75. The Griffons have Randy Dickerson, the Mid-America Intercollegiate Athletic Association's leading scorer and second place rebounder, on their team. Charles Bailey is the MIAA's assist leader and is playing for the Griffons.

The Miners have lost the last five times that they have stepped onto the court. All five of those times have been a conference game. And, the Miners don't have their 6'-6" sophomore center Doug Call.

The Miners came to the court ready to play. Both teams shot about 40% from the field, but it was the outside shots that put the Miners ahead. The Miners made six of 14 from three-point land, while the Griffons only made one of ten. The Miners lead by as many as 12 points in the first half but only led the Griffons 30-24 at halftime. The stun sent the Griffons into the locker room searching for answers.

Answers are what the Griffons found as they came back out and tied the score at 47. The Griffons then went on a 10-0 run to break the tie. But the Miners weren't down. They fought back, but fell short as they lost the game 65-60. The Miners had three players in double figures for points with Will Partin leading the way with 17, Eric Harris had 16, and Kasim Withers put 11 on the board.

With this loss, the Miners are now 0-6 in the MIAA. This is the first time in 31 years that the Miners have been in this position.

"The team's confidence is a little

see Basketball, page 8

Decision may draw major penalty

David Heuschkel
L.A. Times/Washington Post

You know the words. Feel free to sing along: "Ohhhh, Caaaaa-na-da, we stand on guard fo-or theeeeee..."

Way to hold that last note! Now take a deep breath. That odor is the lyrics to Canada's national anthem, which reeks of national hypocrisy.

The stench coming from Ottawa on Friday was an announcement that the federal government's program to aid the financially burdened teams in the country was dead.

"We will not be pursuing the issue any longer," Industry minister John Manley said in a statement.

"There's nothing to negotiate," Premier Mike Harris said. "We don't have a nickel for the NHL owners or players. We're not in this game of subsidizing the NHL and we've made that very clear."

Lord Stanley must have been shivering in his grave while some of the taxpayers were dancing on it.

On Thursday, the Canadian Taxpayers Federation urged people to send a puck to the prime minister to protest the government giving any of the six teams one penny.

Why in the name of Gordie Howe is the country turning its back on the

sport? Isn't hockey, as the folks up North say, a fabric of the culture?

The Quebec Nordiques relocated to Denver in 1995. A year later, the Winnipeg Jets bolted to Phoenix.

Now the Ottawa Senators may follow. How much longer can franchises in Vancouver, Calgary and Edmonton remain viable?

At a conference Friday, Senators owner Rod Bryden said he's going to think things over a week or so before making any decisions.

Just 72 hours earlier, Manley announced the federal government was planning to lend a helping hand.

"The federal government's willingness to participate in a shared solution for Canadian NHL teams is not about giving money to rich hockey players and team owners," Manley said Tuesday. "It's about helping these teams get through a difficult period so they will be in a position to emerge from their current financial problems as sustainable Canadian NHL franchises."

Three days later, Manley looked glum and disappointed.

"In the past few days there has been tremendous negative reaction, much of it from the very stakeholders who would be crucial to the solution," Manley said.

The NHL already provides some compensation to Canadian teams hurt by the low value of their dollar. Most revenue is in Canadian dollars and most expenses mostly player salaries are in U.S. dollars.

The Senators sell out every game and have one of the lowest payrolls in the league. Yet the team is strapped for cash.

According to a poll taken Tuesday and Wednesday, 63 percent was in favor

and 37 percent opposed to the federal government subsidizing selected Canadian NHL teams.

When it was announced Friday that wasn't going to happen, another poll revealed 63 percent agreed and 37 percent disagreed with the decision to revoke the financial aid.

"If it's direct taxpayer dollars that they're talking about to go directly to these teams," Alberta treasurer Stockwell Day said, "then our answer is we're not even looking at dropping the puck in that game."

Soon, they might not be dropping the puck in the nation's capital.

With his 602nd goal Thursday night,

Dallas forward Brett Hull continues to inch closer to his father on the all-time list.

Bobby scored 610 goals in 1,063 games over 16 seasons. Brett has played in 907 games, so he should score more goals in fewer games.

"I told someone this year I wish I could get to 610 and then just quit counting," Brett said.

Over the years, Hull's much-publicized relationship with his father has been hot and cold.

"That would be great," Brett said. "But if you know my dad at all, you never know when he is going to show up or where he is going to show up."

Bruins defenseman Ray Bourque wishes he took one on the chin instead of a few inches higher. Bourque lost three teeth and split his upper lip Monday when Atlanta forward Ray Ferraro's slap shot deflected off the five-time Norris Trophy winner's stick and hit him in the mouth.

The next morning, Bourque

Rams beat Bucaneers, 11-6, in NFC Championship

T.J. Simers

L.A. Times/Washington Post

The NFL has its dream Super Bowl, a reminder to any city tight with public funds that one day it might be forced to watch its heroes play for the glory of suckers/football fans elsewhere.

The St. Louis Rams and Tennessee Titans, living testaments to what new stadiums with expensive luxury boxes can do to resurrect mismanaged franchises, will meet in Relocation Bowl I in Atlanta on Sunday.

Around the league these days it appears a moving van might be every bit as important as a good quarterback.

The party has already begun, with long-suffering Ram fans in St. Louis and die-hard followers of the Titans in Nashville hitting the streets to celebrate their victories. They can't remember the last time their favorite team went this far.

The Rams did it by scoring one touchdown, more than enough to knock out the Tampa Bay Buccaneers, 11-6, Sunday in the NFC Championship Game before 66,496 in the \$280-million, publicly-funded Trans World Dome.

"We're takin' Georgia to Georgia," yelled Ram Coach Dick Vermeil, and don't be surprised if Ram President John Shaw doesn't try to make the city fathers pay for her trip.

It all starts at the top, of course, which makes Super Bowl XXXIV so intriguing: Rams owner Georgia Frontiere matching wits with Titans owner Bud Adams for the right to be mentioned in the same sentence with Vince Lombardi at the postgame trophy ceremony.

In addition to blackmail and extortion charges, which some will level at Frontiere and Adams, there might be some who also suggest that they cheated to get to Atlanta.

The Titans remained alive in the playoffs after benefiting from a forward lateral, which the referee refused to overturn after reviewing instant replay. And the Rams held on in the final minute against the Buccaneers because another referee took away a Tampa Bay completion after an obvious catch.

The Rams, while favored by two touchdowns, jumped ahead of

Tampa Bay, 11-6, with 4:44 to play in the fourth quarter after Ricky Proehl, a 10-year journeyman wide receiver, caught a 30-yard touchdown pass.

The Buccaneers, maybe as punchless as any team in NFL history coming into a title game, responded by marching from their own 23-yard line to the St. Louis 22 with 1:25 to play.

After quarterback Shaun King was sacked for a 13-yard loss, he came right back with a pass to Bert Emanuel at the Rams' 23-yard line. Emanuel made a diving catch, the ball securely in his hands and both knees touching the ground before falling, the tip of the ball hitting the ground.

The NFL observer in the press box, who is the only one who can call for a replay in the final two minutes, signaled the field that he wanted the referee to take another look.

"The ruling on the field was a catch," referee Bill Carollo said later. "It was apparent that the player, that as he was catching the ball, he used the ground, and the tip of the ball hit the ground. By rule, you cannot use the ground, or have assistance from the ground to make a catch."

It's a good rule but did not apply here, because Emanuel had already secured the ball.

"It was one continuous motion," continued Carollo. "He wasn't down by contact. It's still part of the completion. He has to retain the ball when he hits the ground. The knee doesn't make any difference, he used the ground to assist that catch. And because the ball hit the ground, by rule it's an automatic incomplete pass."

On the bright side it saved America from a Tampa Bay-Tennessee Super Bowl with the Buccaneers best chance of winning being a 2-0 shutout over the Titans. It would have been a good way, however, to cap off one of the most ridiculous NFL seasons in memory.

But instead everyone will get "The Rematch," and imagine the anticipation and the talk of revenge. Too bad the schedule had to be pushed back a week to avoid a conflict with the college bowl games, because now there will be only one week of hype before the Rams attempt to avenge a 24-21 loss to the

Titans earlier this season in Nashville's \$300 million publicly funded Adelphia Coliseum.

If that isn't enough to hold everyone's attention, there will be the Kurt Warner story, maybe the NFL's best-ever come-from-nowhere tale of greatness. Before this game, he was already being compared to Dan Fouts, Joe Montana and Johnny Unitas.

Before this season he was back-up to Trent Green, and was not even

protected by the Ram braintrust in the expansion draft. The Browns didn't see any reason to get excited, and passed on him, and after Green went down with a season-ending knee injury, he threw for more than 4,000 yards and 41 touchdowns.

Before joining the Rams, he was stocking shelves in Iowa, playing for the Amsterdam Admirals in the World League and the Barnstormers in the Arena League.

Warner looked like that scrub

overlooked for so long by NFL scouts for much of the day, but he beat the Tampa Bay blitz to find Proehl, and children in St. Louis can eat their \$2.99 box of Warner's Crunch Time cereal Monday morning with a smile.

"I've been playing for 10 years and have never been on a team that's done better than 8-8 and have never even gotten a sniff of the playoffs,"

Despite progress, diligence needed in racism fight

Ken Rosenthal

L.A. Times/Washington Post

Check the news, and there is progress. On the surface, there is always progress. Michael Jordan reportedly could become a 20 percent owner of the Washington Wizards, making him the largest African-American shareholder in an NBA franchise.

Tampa Bay's Shaun King and Tennessee's Steve McNair could become the first pair of African-American quarterbacks to start a Super Bowl, and Tampa Bay's Tony Dungy could become the first African-American to coach in one.

Progress. Undeniable progress.

But check the news again.

John Rocker. Jesse Jackson. A damning new study on the racial demographics of NCAA athletic departments.

How far have we come, really?

Will we ever get where we need to go?

Sports reflects society, and racism is the national disease. It needs to be confronted the way addictions are confronted. By owning up to the problem. Then by trying to overcome it, each and every day.

No one wants to hear that, of course. People would rather bury their heads, point their fingers, apply their senseless Band-Aids.

Meanwhile, the arguments become so twisted, they're not even the right arguments anymore.

The furor over Rocker's comments to Sports Illustrated is one example. Jackson's defense of Ray Rhodes is another. And in a Jan. 10 interview on WBAL (Baltimore) Radio, Colts legend John Unitas engaged in his form of racial stereotyping, attributing the increase of celebratory dances in the NFL to "the black influence."

Unitas, 66, did not back down from his statement Friday, saying,

"It's just their way of doing things, that's all."

Well, it's not Peter Boulware's way of doing things. It wasn't Barry Sanders' or Walter Payton's way of doing things. It wasn't Lenny Moore's way of doing things, and he was Unitas' teammate.

More than anything, the celebrations reflect a change in times. Football is no longer just sport; it's entertainment. Players strike cartoonish poses, and fans hooked on video games and ESPN cheer them wildly.

Kansas City receiver Elmo Wright, an African-American, was believed to be the first player to perform a touchdown dance. And it probably can be quantified that more blacks are penalized for excessive celebration than whites.

But how does that explain former New York Jets defensive end Mark Gastineau?

Or Atlanta's excitable Tim Dwight?

The danger is in stereotyping, in believing that every member of a racial, ethnic or religious group shares the same characteristics and convictions.

It's politically correct to say the right thing.

It's more difficult to think the right thing, but every religion on earth preaches tolerance. Rocker's views probably are shared by more people than you think. He just wasn't smart enough to keep his bigotry to himself.

What would have happened to an average Joe who had made public statements as offensive as Rocker's? He would have been fired.

Rocker isn't an average Joe. He's a left-handed closer who throws 95 mph. He likely will be suspended by Commissioner Bud Selig. But bless the players' union, he's not about to lose his job.

If the Atlanta Braves released Rocker, they would be in violation

of the major-league baseball labor agreement, which prohibits roster moves for disciplinary reasons. They could always trade Rocker, but no team would take a chance on him before Selig acted.

What is Selig waiting for? The results of Rocker's psychiatric evaluations.

As if Freud invented psychoanalysis to cure prejudice, or instill intelligence into empty minds.

Two questions, Bud:

Since MLB is on a sensitivity kick, how about ordering Rocker's team to adopt a new nickname rather than continuing to offend Native Americans?

And, since MLB is on a mental health kick, how about ordering psychiatric evaluations for a certain Orioles right fielder who made obscene gestures at fans who heckled him last season?

Some white fans probably suspect it's because Albert Belle is black. Well, Belle has been suspended six times. The reason he didn't get the Rocker treatment is that MLB needed a quick response to its latest bad boy. And the psychiatric evaluations bought Selig time.

The best solution now would be for Selig to do nothing, forcing the Braves to deal with the problem, most likely through a trade, and Rocker to deal with the animosity he would face from teammates, opponents and fans.

Hey, John, ever hear of Charles Darwin?

Only the strong survive.

The same theory applies to NFL head coaches, which is why Jackson's protest of Rhodes' firing was so ridiculous. Rhodes, an African-American, finished 8-8 with Green Bay - the same record that got Pete Carroll and Chan Gailey, two white coaches, fired in New

Rams

From page 7

Proehl said. "This is incredible."

You want incredible: It was a guy from USC who put the Rams in the Super Bowl. Cornerback Brian Kelly, assigned man-to-man coverage of Proehl, could not keep him from scoring the game's only touchdown.

"We brought them into our zone, we brought them into misery and we had them down 6-5, and it came down to one play," said Tampa Bay defensive leader Warren Sapp. "The guy made a great play on the sideline no doubt about it. And we didn't do it."

The Titans will counter Warner's feel-good story, which includes his marriage to Brenda and adopting her child, who suffered an accident at four months of age rendering him blind, with defensive end Jevon Kearse, whose father and brother were killed by gunfire.

The most compelling story,

however, does not guarantee a Super Bowl victory.

"We just have to keep knocking them down for one more week," said Ram defensive lineman D'Marco Farr, one of five Rams who played for the team in Anaheim. "They said Tampa Bay had the best defense, but as everyone can see, they are going home. What I'm starting to learn about this playoff stuff and competing for a championship is that stats don't mean anything. All that matters at the end of the game is who has more points."

Too bad they didn't think of that while they still played their games in Anaheim, Calif.

The Rams, cocky all week, appeared to have a commanding 5-3 lead at halftime against the Buccaneers, who could muster no offense. St. Louis had the lead because Tampa Bay center Tony Mayberry snapped the ball over King's head in the shotgun formation, forcing King to knock it out of bounds for a safety rather than allow the Rams to fall

on it in the end zone for a touchdown.

Tampa Bay took a 6-5 lead in the third quarter on Martin Gramatica's 23-yard field goal, and that's the way it remained until Ram cornerback Dre' Bly intercepted a King pass at the St. Louis 44-yard line and returned it to the Tampa 47 with 8:01 to play. Five plays later, Warner told Proehl he was coming his way if the Buccaneers blitzed.

They blitzed.

"After getting shellacked for so many years, but telling people we were a good team and nobody would believe us, I'm just going to sit here and enjoy this," Farr said. "You think I can just go out still dressed in my uniform and get into a restaurant tonight? I just don't want any of this to end."

It's just beginning for the Rams and Titans as they go to Atlanta, and next thing you know, someone's going to get the idea that the road to the Super Bowl is a move to Los Angeles.

Track opens indoor season at Eastern Illinois

Tera McCallum

Sports Writer

The Miner track team opened their indoor season this past week-

end in the Eastern Illinois Invitational. Despite many injuries and illnesses keeping the team back as they prepared for their first meet of the season, the team fared well in

their opener.

The Eastern Illinois meet fielded a full range of schools including National Collegiate Athletic Association Division I schools, the home

school Eastern Illinois and the University of Dayton. In the past the Miners have had trouble competing with Division I schools, but this year the Miners got one of their first first places against a field of Division I schools.

The first place finish came from newcomer, transfer student Dale Elliott in the 800. Elliott posted a time of 1:58.92, which was good to defeat the entire field.

"Dale's finish in the 800 was really a high point in the meet for us," said Coach Sarah Preston. "To get a first place finish in a field of Division I runners is quite an accomplishment."

Elliott's 800 was not the only event where the Miners excelled. The Miners also got a second place finish out of the 4x8 team of Matt Tieg, Andy Kasper, Andy Hart, and Nick Ragsdale. The second place team finished in a time of 8:45.23.

There were multiple other top ten finishes on the day for the Miners. The Miners had another stand-out performance in relays in the distance medley relay. With the team of Elliott (running the 1200), Mike Smolinski (running the 400), Josh Sales (running the 800) and Kevin McGuire (running the 1600). The team finished with an impressive third place, and Elliott showed his speed once again as he led off against a Division I runner who has posted times in the mile of 4:12 and kept pace the entire way.

Other top ten finisher were Sales in the 1000. Sales posted a time of 2:44.29 which was good for a fourth place finish. Another fourth place finish was posted by Scott Borchers who made it to finals in the 55-yard hurdles. Borchers posted a time of 7.96 in the prelims and a time of 7.99 in the finals which put him in fourth place.

Andy Kasper put in the next

best performance of the day in the 800. Kasper posted a time of 2:07.82 which put him in sixth place.

The Miners had a trio of seventh place finishes. Newcomer Genesis Williams, another transfer student, posted a time of 7.12 in the 60 meters in his first race as a Miner.

Distance runners Kevin Johnson and McGuire posted the other two seventh place finishes. Johnson took seventh in the 3000-meter in a time of 9:44.64, while McGuire posted a time of 16:23.66 in the 5000-meters.

The women's team, also hit hard by injury and illness, fielded only two women. Senior Sheri Lentz and freshman Nicole Schmidt were the only women available to run and together were not able to post any points in the women's competition.

"In all I think we fared well in this meet," said Preston, "To come from a Division I meet with any score is a positive thing. I feel that we had a really good start to the season. As I said this meet went really well. I think we found quite a few things that we need to work on the next few weeks."

In the following weeks the team looks to get all of their runners healthy and ready to run. Next week the team will travel to Missouri Southern in Joplin, Mo. The meet will be the first one on a brand new indoor facility that Missouri Southern has built. The meet should be a very difficult one for the Miners, but the Miners feel that after the tough one that they had this weekend without a full team, they should still be very competitive this coming weekend.

The Miners only have four more meets until their conference meet in Warrensburg, Mo. Central Missouri State University will be the host school for the conference meet.

Racism

From page 9

England and Dallas.

If there's a "victim," it's Gailey, who made the playoffs but couldn't please owner Jerry Jones. Yet, Jackson jumped to his own stereotypical conclusions - if a black coach was fired, it must have been racism.

What Jackson should realize is that Rhodes was treated just like a recycled white coach when he was hired, and just like any failed white coach when he was dismissed. Believe it or not, that's progress.

If Jackson wants to pick a better fight, he should target the NCAA.

Jim Haney, executive director of the National Association of Basketball Coaches, could provide him with all the statistical information he needs.

Haney, who is white, researched the athletic departments of the 18 university presidents who comprise the Division I Board of

Directors. The 17 schools besides South Carolina State a historically black school had 103 employees in core management positions. Only three were black.

So much for our institutions of higher learning setting an example.

Organizations like the NCAA can roll out a dozen other studies that defend their hiring practices.

But again, it's only surface progress, if you want to consider it progress at all.

The issue is rather simple, really:

You fight the disease, or you succumb.

Writers needed!

Victorian insight

Evan Rau

Features Writer

When asked to name one book that George Eliot wrote, a person might say, "I've never read anything by that guy." Well, you would be right, because it was a girl.

The lecture on Friday, Jan. 21 given by Dr. Linda K. Hughes, the Addie Levy Professor of Literature at Texas Christian University provided an in-depth look at some of the prominent woman writers of the Victorian Era with "Multimedia, Victorian Style: Competing Forms in the Literary Market Place." It was part of the ongoing Humanities and Social Sciences Lecture Series at the University of Missouri - Rolla.

The lecture took place at Uni-

versity Center East on the UMR campus and began at 3:30 p.m., lasting about an hour. Hughes packed that hour, though, with enough Victorian literature information to humble even the most confident literature scholar.

During the lecture, various examples were given of those women who defined Victorian writing with their unconventional positions as writers. Women like George Eliot, Elizabeth Gaskell and Anthony Trollope, to name a few, were focused upon and pushed into the limelight as revolutionary writers and revolutionary women. They were discussed not only for their prominence in the literary field, but their effects on literature of the time and of present day.

Hughes has written and pub-

lished a book-length study of Alfred Lord Tennyson's dramatic monologues and is the co-author of two other books: "The Victorian Serial" and "Victorian Publishing and Mrs. Gaskell's Work," both under the University of Virginia Press. In addition to these works, she has also written several scholarly articles and essay on the subject and served as the editor of a special issue of Victorian Poetry, "Victorian Women Poets." Hughes taught at UMR from 1976 to 1984.

Anyone who missed the lecture and is interested in hearing more about it might contact Dr. Larry Vonalt, associate professor of English at (573) 341-4630 or by email at lvonalt@umr.edu.

Dr. Linda Hughes gives a lecture featuring Victorian women's literature on Friday, Jan. 21.

Riverdance comes to UMR

Priscilla Schulte

Features Writer

Footworks is a traditional percussive dance troupe that is known for staging spectacular performances which showcase traditional dance. Footworks has a rich cultural heritage, and members of Footworks have studied and performed traditional percussive dance from many different cultures, including Irish, Scottish, English, African and American. Footworks' productions have spanned the globe, taking place in the United States, Canada, the United Kingdom and Japan. Footworks sold out its tour of the United Kingdom and performed as guest artists at the production of Riverdance in London. The company has received fantastic reviews for their performances and is known as an important part of American culture.

The roots of Footworks date back to 1971 when the Green Grass Cloggers was formed, the group that made traditional Appalachian clogging popular. They studied traditional dance and music from the old-time buck dancers and flatfooters of North Carolina, Virginia and Tennessee. The Green Grass Cloggers was foremost in the movement to bring traditional Appalachian clogging into the performing arts arena. Three members of the Green Grass Cloggers formed their own group in 1979, called The Fiddle Puppet Dancers. The Fiddle Puppet Dancers changed their

name to Footworks in 1994. Eileen Carson, one of the three original members of The Fiddle Puppet Dancers, is now the artistic director for Footworks and received a National Endowment for the Arts Choreography Fellowship in 1994 for her unique accomplishments.

Footworks has performed at international festivals all over North America and the United Kingdom and was chosen by the Smithsonian Institute to represent American culture on a tour through Japan. Footworks has also performed in such notable places as The Kennedy Center, The Lincoln Center and The Glasgow Royal Concert Hall. Footworks demonstrates and teaches cultural dance, songs and rhythms to all groups of people, including children in the classroom. Carson says the company remains dedicated to bringing live music and the power and joy of percussive dance to audiences all over the world.

Footworks' productions have received excellent reviews from critics in the United States and United Kingdom, including The Washington Post.

"... This festival of Washington dance has returned in a new, improved version at the Kennedy Center's Terrace Theatre where it deserves to be... Perhaps the most unusual item of the program was its exhilarating conclusion, a piece called 'The Blending,' performed with unflagging zest and bravura by Footworks. The dance is an anthology of step dance idioms ranging from the high-kicking Irish variety to syncopated jazz tap to the rustic wit of Appalachian clogging, wonderfully sewn into a brisk continuum," Alan Kriegsmann

Footworks dance team will stomp its way into UMR on Friday, Jan. 28.

Chad Cole's Culinary Corner: Carbohydrates and no alcohol for the happy skier

Chad Cole

Culinary Columnist

Are my legions of fans ready to be edified once again? Can you handle it? If my constant stream of vital food information comes as too much too fast, just sit back and relax a moment. The human brain can only hold so much and I'm shoveling plenty your way each week. You've been cautioned, now get ready because here it comes...

Skiing and food part II:

Okay, so you've made it to the mountains and you're ready for some extreme skiing. Well, you better be extremely aware of what kind of food you eat before, during, and after your fun on the slopes if you want to get the most out of your ski trip. The night before the big all-day ski fests should not be filled with a bacchanalian revelry. Most ski towns are party towns and you may be wanting to get trashed after a long hard drive, but your body needs a good night's sleep before the skiing, and I don't mean an alcohol induced coma kind good sleep. Also, be aware that higher altitudes thin your blood, which makes alcohol affect you even

more. (Some of you cheap luses may find it convenient to move out there after graduation) Save the partying for a night where you won't be skiing the next day, or maybe when you're just going to get a half-day lift ticket. A big plate of pasta or some other form of complex carbohydrates would be your best bet for the night before. This will help with a good night's rest and your body will have plenty of stored energy for the next day.

Now, the breakfast before an intense ski workout is simple—Think BIG. Big, as in lots of fat and grease and quantity. A ski trip is not the time to go on a health kick or a diet. Your body will CRAVE massive amounts of fats to function properly on the mountain, because, whether it feels like it or not, if you get out there and ski for three to five hours, you're burning some major calories. My first advice is to find a good all-you-can eat place to stop in and load up. Eggs, bacon, sausage, pancakes, these are all great high-energy foods. If all-you-can-eat is not an option, then at least get some quality grease at a fast-food establishment. McDonald's

see Skiing, page 12

CD Review: Nu quartet returns

Heather Grimes
CD Reviewer

It's On!, the title of this week's CD review, describes the new sound for the four-man group, nuflavor. This is the second album from the quartet since they first started out in 1994. At a party, back home in Long Beach California, two of the four members began singing along with the music, and then the other two members joined in. Their powerful harmony struck them in such a way, that they knew it was the beginning of their musical careers.

Their self-titled debut album reached the Top Ten list twice, with "Heaven" and "Sweet Sexy Thing." This shouldn't be a surprise considering Rico, Jacob, Anthony, and Frank collaborate not only in harmony, but song writing as well. Anthony is the primary lyricist, but each member contributes his own melodies, lyrics, and beat, to form a fresh, funky, pop sound. The members spend the majority of their writing time while on tour with well-known artists such as Rod Stewart, Mariah Carey and Hootie and the Blowfish.

They set a goal each time they begin a new album to create a new sound, and this time they have out-done themselves. *It's On!* embodies sweet, yet seductive love songs with a rhythm you can move to. The first track, "Sprung," represents the basic theme throughout the entire collection. It has a racy theme of on-going attraction finally being realized. The quartet conveys a message of love, but doesn't forget about those who like to dance. "Sprung" is featured again as a spicy remix adding a drum beat as well as a few other corks. If you are curious about the meaning of the word sprung, Anthony attempts to explain, "Sprung is slang for someone who is engulfed in someone else. They have a crush."

While I expect "Sprung" to be the first release off of the album, the Hot Track for this week is a little different. "Most Beautiful Girl" steps away from the seductive role, and takes on a more melodic approach on the subject of love. The melody and instrumental arrangement is expressed in a more conventional way. For example, they apply an acoustic dimension, as opposed to the synthesized arrangements of the other songs. "Most Beautiful Girl" tells a story of a man secretly in love with someone for several years. Since then, the two have come together, and he feels real love for the first time. Nuflavor thanks God for all of their success, and they slip in a subtle hint of their spiritual beliefs in the lyric, "It feels like heaven to me. Love has given me wings."

Overall, I thoroughly enjoyed this CD. "It's On!" deserves a **** for its dynamics of harmony, lyrics, and musical arrangement. For the lovers of R&B-Soul, I recommend visiting www.nuflavormusic.com, for sampling and purchasing *It's On!*

Footworks

From page 11

wrote in "The Washington Post".

"One of the most exciting and unusual acts at this year's Edinburgh Folk festival was a group of dancers and musicians from Maryland whose visual impact almost defied description. Footworks' main showcase was part of the final Farewell Concert on the Sunday evening, and they proved a very difficult act for anybody to follow," Neil Hegdeldand wrote in "Folk Roots" in London.

"The sheer rhythmic and visual magic of percussive dance troupe Footworks - soon to join the Riverdance show in London - kicking out a dazzling array of hard shoe and clogging routines from around the world, match breathtaking physical talents with brilliantly imaginative choreography," Sue Wilson wrote in "The Scotsman" in Edinburgh, Scotland.

Footworks will be the next presentation in The University of Missouri-Rolla Campus Performing Arts Series. They will perform on Friday, Jan. 28 at 8 p.m. in Leach Theatre of Castleman Hall. Tickets cost \$16 for adults and \$12 for those age 18 and younger. For more information, call the UMR Ticket Window at 341-4219.

Nuflavor returns with a dynamic album containing the two top ten singles "Sprung" and "Sweet Sexy Thing." photo courtesy of Reprise Records

Skiing

From page 11

is almost always available and perfectly suitable to ski on. Breakfast is probably the most important meal in everyday life, but when it comes to a big day of skiing, it is BY FAR the most important. Also, loading up on the first meal can save you some cash when it comes to buying a lunch up on the ski resort.

Food that is sold at the mountain restaurants is just a bit pricey. In fact, if you make a habit of eating a couple of meals on the slopes each day, this could very quickly cut into your gas money for the drive home. I suggest loading your pockets up with food before making it to the ski resort. Almost every heavy ski coat was a cornucopia of pockets and good places to stick food in. Make use of these for two reasons: first, this will save you from having to purchase that expensive food at the resort and second, it is a great thing to be able to just reach into a pocket and,

voila, magically pull out something to snack on - perfect for long ski lifts, cross-country hikes up the boles and when hanging out in the less populated and foodless out-of-bounds areas. My favorite foods to fill my pockets are apples, trail mix or mixed nuts (this is a must - lots of calorie dense fat), sandwiches (though be careful which pocket you put these in, as they are very delicate and easy to get soggy. I suggest clearing your pockets of all sandwiches as soon as possible. This is one item that you don't want to accidentally forget about until you run into it a week later, complete with an array of multi-colored funguses and bacteria), cheez-its, cookies, and dried fruit.

Some people bring water bottles with them, but if you tote along a couple of apples, you should be safe. Apples are a much tastier way to rehydrate the body. A nice hot chocolate or coffee is a great way to take an intermission from skiing and warm up. The caffeine can also give you an extra boost out on your skis. If you are twenty-one, then the best way to supplement

alcohol into your trip is to have a nice cold one in the afternoon, after all of the skiing is behind you. That is one of the greatest things about the trip, just sitting back on the deck after a hard day's skiing with a cold beer in your hand and an eye full of ski bunnies to keep you occupied. The untainted mountain atmosphere, the sun just beginning to hide behind a mosaic of some of the best scenery to lie upon our planet, and a pint of liquid refreshment is just what you need to enhance an already fun-filled day. Life is great. Hanging out at a ski resort's bar at three or four o'clock in the afternoon is also a good way to meet people.

Well, that sums up about everything that I can think of right now, so I'll close this up. You may want to read through this article a few times, just to make sure that it all sticks in your head. It would be an egregious error to forget even a tiny bit of this priceless sermon. Goodbye and good luck on all of your skiing and food endeavors!

The Missouri Miner

Page 13

Does it cost you too much to skip class?

Rebecca Lexa

Features Writer

So...are you going to class today? At the University of Missouri—Rolla, there is no single answer to that question. Generally speaking, your professors and teachers are going to say "yes" with few exceptions (severe illness, act of God, etc.). Students, on the other hand, will have varying answers depending upon when the class is, what is being taught, and how interested they are in the subject matter.

Different professors have individual policies regarding attendance. Some, like Dr. Tsegai Isaac, Associate Professor of Political Science, don't require students to be in class, but do elaborate on the importance of class attendance. "I do emphasize it, but it is not mandatory," he says.

"I do not penalize them [the students] for not going," Professor and Chairman of Biological Sciences, Nord Gale, has policies for certain classes. "I have a policy in some of my classes, that if a student misses so many times, this justifies us lowering their grade by one letter grade. It depends on the students and it depends on the class."

Other teachers do make attendance mandatory. Mr. Clayton Price, Undergraduate Coordinator and Freshman Advisor for Computer Science says, "Yes, I make it mandatory. I, like most everybody else in the faculty, believe it to be an obvious requirement to show up."

There is variation, too, in students' personal "policies" on class attendance. Senior Scott Valentine, a Computer Engineering major, says about attending classes, "In general I would say yes just because it helps you keep up, not just with course material but also with assignments and turning things in." But, he goes on to say, "It depends on what time of day they hold class." A class held at 1:30 p.m. is generally going to be better attended than one at 8:05 a.m.

Some students are very diligent in attendance. "I never miss," says Senior Electrical Engineering student Clay Yarbrough. "A lot of the classes do notes and stuff outside of your text."

And almost everyone, student or teacher, knows that one individual who can never quite seem to make it to class. But, as Sophomore Geological Engineering student C.J. Burnley states, "Certain subjects you do need to attend." Particularly noted

in this respect are classes which are the basis for later ones.

Not surprisingly, both students and teachers tend to have similar feelings on why class attendance is necessary. Much of it revolves around the success of the learning involved in the class, as well as actual grades. Graduate student Satya Tatavarthy comments that "It's obviously necessary because you miss classes and you lose track. You can catch up, but it's not advisable [to skip]."

A student's understanding of the subject can greatly be aided by attending class. "A book may not offer the best explanation for something. That's what they're [the classes] there for," said Valentine. This can lead to how well a student performs overall.

Sophomore Laura Schreiter, a Mechanical Engineering student, found out the hard way. She had declines both in attendance and grades last semester. Now she says, "The more I go to class the better my grades are." Most professors would agree.

Gale states, "I find it true that students who do not attend class regularly generally have trouble on exams."

see Attendance, page 14

Winter Film Series presents

This week, the University of Missouri—Rolla Film series will present: *Lock, Stock, and Two Smoking Barrels*, starring Jason Fleming, Dexter Fletcher, Nick Morgan, and Jason Statham and directed by Guy Ritchie.

Set in the London underworld, this offbeat gangster comedy tells of a streetwise card shark named Eddie who walks into the biggest card game of his life, carrying a \$100,000 stake into which he and three buddies have invested their hard-earned cash. While Eddie is the sharpest on the circuit, the game is a set-up and he leaves owing Hatchet Harry half a million.

With only a week to raise the money, Eddie and his gang find themselves embroiled in a series of increasingly dangerous dealings. Meanwhile, Eddie's father can cancel the debt by handing over his bar—lock, stock and barrel—to his old adversary, Harry. R—1999.

The movie will be shown in Leach Theatre of Castleman Hall this Tuesday, Feb. 1, at 7 p.m.

TECHS: Take some time to visit 'Wellsville'

Hope Burken

UMR-TECHS

On Feb. 16 take time to visit Wellsville, a Health Watch Community. Stroll down Physical Avenue to check out your blood type, blood pressure or blood sugar. Meet your friends on Social Circle and learn about other campus organizations. Educate yourself about recycling on Environmental Lane. Relax on the Spiritual Expressway and Emotional Boulevard. A hike into the great outdoors is a must, where you can learn about organ donation and have your hearing tested at the nearby University Center East campsites.

Join us and the rest of the University of Missouri—Rolla community for the Wellness Bash 2000 located on the 2nd floor of UCE from 9 a.m. until 3 p.m. This event is being sponsored by Student Health Services, with UMR's Staff Council teaming up to make the event open and free to all students, staff, and faculty.

Is your dictionary a doorstop? Here are some better uses...

Bevin Raines

Writing Across the Curriculum

Keep your dictionary nearby when writing a paper. If you are aren't sure of whether or not you are using a word correctly, look it up. This way you can avoid the embarrassment of using the wrong word, using a word with a meaning different than the meaning you intended, or creating something that isn't a word. You can't rely on the computer's spell check to find all of your spelling mistakes. The spell check will miss homophones as well as typographical errors that still form a word. When in doubt, turn to the dictionary.

Dictionaries are also invaluable when you are at a loss for words or can't think of the word you want to use. Many definitions of words also include synonyms, and one of these synonyms may be the word you are looking for or may inspire you to think

of a more fitting word. Thesauruses are even more helpful than dictionaries for this purpose, but if you don't have a thesaurus handy, then a dictionary will suffice.

Unless you are writing a paper dealing with etymology, do not use a dictionary as a reference. Do not quote definitions from the dictionary in your paper, and never start the introduction of your paper by quoting a definition. Dictionary quotes are boring for readers, and if your readers are intelligent, then they don't need common words defined for them. Technical words need defining when the audience of a paper or grant proposal includes non-technical people, but use your own words to explain technical terms as simply as possible rather than quoting someone else's definition.

The dictionary is too valuable of a tool to let collect dust on your shelf. Consider purchasing a dictionary if you don't have one at your disposal.

It's all downhill from here!

Azurdee M. Garland

St. Pat's Committee

St. Pat's is off to a roaring start this semester. We have just pasted the 50 Daze mark and its down hill from here. If you missed the Queens and Knights photo shoot for any reason contact Issa Boileau cboileau@u.mr.edu to schedule an alternate time.

Just to remind everyone, St. Pat's 2000 novelties are now available at the puck every day except Wednesdays (we are in front of Comp Sci). Novelties include mugs, can coolies

and gold plated shot glasses. If you can't make it to the puck to pick up your favorite novelty don't worry, contact your local St. Pat's rep and he or she will be able to help you out (as long as the novelties are still in stock).

St. Pat's facts for the week:

*In 1908, Dr. Lewis E. Young, along with Senior class of 1908, was named one of the first "Knights of the Order of St. Patrick."

*The St. Pat's Board was officially created on December 11, 1930 by a three to one majority vote by the student body.

Let your SUBconscious be your guide

Kate Carter

Student Union Board

Well, the Student Union Board hopes that everyone enjoyed the SUBsandwiches that were passed out at the puck last week. We wanted to welcome everybody back and show some of the things that we do.

If you are interesting in joining SUB or if you want to give us some ideas on what you would like brought to the campus please come and attend our first of the semester SUB meeting. Our get-together is going to be Wednesday Jan. 26 at 6 p.m. in ME104. Otherwise you can e-mail us at sub@umr.edu.

There are many different ways to get involved with SUB!! You can join one of the many committees that we

have: Publicity, Concerts, Variety, Special Events, Leisure and Recreation, Performing Arts, Film and Video, and Light and Sound committees, you can help coordinate and select the events for the UMR campus.

This weekend we are having a Julia Roberts weekend with "Conspiracy Theory" and "Runaway Bride." The movies will be at 7 p.m. and 9 p.m. in ME104, Friday and Saturday nights. Also, coming soon in February is the winter concert series. Every Thursday night, beginning Feb. 10, at 8 p.m. there will be a band playing in the UC-East Cafeteria. 2/10 Third Degree, 2/17 Four Shadow, 2/24 MU330. For further detail please contact SUB at 341-4220 or sub@umr.edu.

Celebrate Easter with 'Rez Week'

Devin Martin

CCF

This April, like every April, many people will be celebrating the holiday called Easter. When most people think of Easter, they probably think of dressing up nice, maybe sitting quietly through a church service in the morning and probably eating a fancy dinner with family. Or maybe they think of bunnies and Easter egg hunts and candies. Well get ready to throw these notions out the window because there's so much MORE to Easter. Easter is about celebrating Jesus' resurrection and victory over death. Since many of us will probably die someday, Jesus' victory over death is definitely something to celebrate!

April 17-22 (the week before Easter), UMR's campus ministries will be uniting to celebrate Jesus—his life, death, and resurrection—in an event called Rez Week. Through speakers, concerts, coffeehouses and meals, opportunities will be provided for all UMR's students to learn about this amazing, unforgettable man; and enjoy some fun and celebration in the process.

Rez Week is currently being planned and we're still looking for volunteers to help coordinate all the events. If you can help, or you have an idea of a unique or interesting way to celebrate or teach about Jesus, we'd love to hear from you. We are meeting weekly at the BSU at 9 p.m. on Mondays, or you can contact devin@umr.edu.

Humor:**Shrink Hall Declared Death-Trap**

Marmaduke Gump
Humor Columnist

U.S. News and World Reports, the nation's leading arms supplier and news publication, shocked a total of six University of Missouri-Rolla students this weekend by announcing Shrink Hall, home of the Chemistry and Chemical Engineering departments, as a "Death-Trap worthy of complete and total annihilation." The article, to come out in next week's issue, ranks the building and departments "second only to the 7-11 in downtown Baghdad in world safety hazards."

"Our undercover journalists have been monitoring national safety hazards for well over five years now, and only one other time have we stumbled quite literally over so many dead bodies," journalist Edgar Kabibble told the Missouri Miner. The other instance mentioned was the massacre of 65 mimes in Central Park on April 1, 1996.

The four-page report, the result of several years of research outlined several distinct dangers inherent in the construction and instruction inside the Chemical Engineering building. Several specific findings were released prior to an official announcement:

-Large guillotine/trip-wire mechanism in sub basement found not OSHA compliant.

-Vats of Anthrax were left open and unattended for several days straight.

-The remnants of the 1967 tire fire, started during the sanitation strike of th at year, are still burning on the roof of the building.

-4 out of 5 faculty members were found with a BAC of 4% in the early afternoon for five consecutive days.

-Genetically Engineered half-man/half-gorilla, allowed to teach Chem 3 courses, was not lice-free.

Undergraduate students have been found to participate most willingly in many of the illegal activities in the building. These range from Methamphetamine production to textile sweatshop management. Graduate students and Teaching Assistants (TA's) were exempt from the investigation due to their generally aloof nature, plausible ignorance, and inability to communicate with Arkansas'ens.

For the rest of the student body, most have put the entire South end of campus out of sight, out of mind. Chemistry students are fully aware of the dangers in Shrink Hall and are the few daring enough to perform dangerous "heating" experiments in the building. Professors, running under-

ground prostitution operations, have plea-bargained out of jail time by turning over papers tying their department to the notorious Nuclear Engineering administration.

The report, which was unofficially released on Saturday, took four computer science and two history students by surprise. Berti Ernst, who majors in History, told the Missouri Miner "I had never really been in the building, so I always assumed it was okay. I thought those fire trucks I always saw outside were there to hose down anti-bookstore demonstrators."

The U.S. News article is not the first investigation to the Chemistry building this decade. Only last year, an independent study done by the U.S. government showed over \$3.5 billion dollars have mysteriously disappeared from the department's accounts. None of the faculty could be reached for comment, as they were all in Tahiti for the winter.

The preceding article contained childish stupidity and should not have been read by those five years of age and older. The author claims no responsibility for accidental death, spontaneous combustion, fried tomatoes, or the heartbreak of psoriasis brought on by this piece of literary buffoonery. Reader discretion was advised.

Duct Tape: Is it a Teen Fashion Statement?

DeNeen L. Brown
The Washington Post

WASHINGTON — Teen culture ain't whack, it just needs a little duct tape. The gray rolls, the same stuff lying in the junk drawer, are cutting edge these days. We won't say it's trendy because, well, like, trendy is, like, a bad word (and this can get a little sticky). Kids wearing duct tape would hate it if you called them trendy because trendy is for the social set and those who wear designer labels and those who wear clothes because they care what other people think about what they are wearing.

Duct tape is not a stealth status symbol. These kids are wearing duct tape not because everyone else is wearing duct tape. To them, cutting off a piece of duct tape and patching a hole in their jeans or repairing a loose sole on a pair of Converse All Stars is, like, you know, functional. Like it totally makes sense. Making a prom dress or a tuxedo out of duct tape is, like, so anti-corporate, anti-world hype, anti-commercialism.

"I know in the punk scene, they use Super Glue and safety pins, and they are into do-it-your-

self. You just like, patch things up. A lot of people make their own clothes," says Danielle Joray, 15, a tenth-grader at Eleanor Roosevelt High School in Greenbelt, Md. "It's finding the cheapest possible way without giving in to big corporate kind of stuff. A lot of things we buy, we can do it ourselves and we won't be exploiting anyone like children and people."

They wear duct tape not because they don't have the money to buy something new. Money is not the problem. It's wearing the brand-new stuff that is the problem.

"Most of them have the money," she says, twisting a bracelet she made by cutting the tops off tube socks and taping them together with duct tape. "They just don't feel like it."

Danielle calls herself "half raver, half punk."

"A lot of punks I know are into activism. They are all into that. A lot of people think we are really violent, bad kids, and we are not. Being punk is being more into activism and wanting to change things and not conforming to the trend and being part of a bigger

Fashion:**Get boots or get the boot!**

Abere Karibi-Ikiriko
Fashion Columnist

With all the homework to do and tests to study for, students don't have time to worry about what to wear. For most students, anything would do. However, I searched the campus to bring you this week's campus fashion.

Mo Koloi poses for the camera while standing in line during the SUB lunch at the puck on Wednesday. She combines bright and dark colors that make her stand out on this gloomy winter's day. She is wearing a lime colored long-sleeved turtle neck polo made by DKNY. The top has a flattering small pocket on the chest, which she reveals with her pose. She is also wearing a dark blue pair of fitted French Connection jeans and black Nine West boots with a unique heel. To top it all and to protect her from the weather, she wears a warm black Calvin Klein jacket. It would be hard to ignore Mo's gorgeous mane. She wears it in shoulder length braids that curl at the ends giving her a bouncy and vibrant look, it's no wonder she is smiling. With a designer look that is this comfortable, she is ready to take on whatever and whomever the day may bring with confidence.

Fashion advice for girls: The Boot

This season, boots are the new black, so to speak. Flat, wedge, stiletto, ankle, mid-calf, knee-high, pointy-toe, round-toe, square-toe, modified cowboy — you get the picture. This is the season of the boot any way you shape it. As with any shoe, the important thing is what you wear with your boots. The good news is you can wear your boots with almost anything this season, so

there's no overextending your shoe budget! Boots definitely give any girl a stylish look, so go out and get a pair of boots or get the boot!

Fashion advice for guys: Fall into 2000

The new millennium is drawing near and fall fashion trends are following suit with a more futuristic approach to modern apparel. The look is utilitarian chic — clothes are softer and deconstructed in seasonless fabrics that lend themselves equally to both style and function. To further relax the look, basic black is making way for color and textured fabrics — from burnt reds and oranges to subtler olive green and gray. Simply put, uniform dressing is out; the emphasis this season is on individuality, comfort and expressing your own personal style.

group and not accepting society's views."

A lot of her friends keep duct tape in their lockers, "like a security blanket." You never know when your world might start falling apart and you need duct tape to pull it back together. It's the adhesive for activists.

Danielle mends her pants with duct tape and made a pillow with duct tape. She has duct-taped her textbooks and the binders on which she writes messages to the world, including "Candy Kids Rule." But that is another story.

She's at the home of her friend Nicholas Klinovsky, 16, another tenth-grader at Eleanor Roosevelt, sitting on a cushion made of styrofoam from a computer packing box, over which she placed red cloth and fastened it all together with duct tape.

Nicholas uses duct tape to keep his Converse All Stars together. "They have a tendency to fall apart quickly," he says. "My parents complained that the soles of my shoes were coming off, so I fixed them with duct tape. 'Chucks' are really comfortable when you break them in. It was a pain to see them go to waste."

With duct tape, "I solved a whole lot of my problems with my shoes."

His mother smiles and thinks it may be a little dangerous. His parents gave him new shoes, and he got a new roll of duct tape for Hanukah.

Duct tape may be an anti-fashion statement. "We're too cool to care. It's like the ultimate in chilling out and being unconcerned with appearance," says Irma Zandl, president of the Zandl Group, a trends research firm in New York City.

Recently, kids as young middle school age have been making skirts, purses, backpacks and wallets out of duct tape.

"I went pretty crazy with duct tape at one time," says David Witty, 21, who lives in Springfield, Va. "I made duct tape visors and duct tape purses. I was just sitting around the house bored. I had some duct tape and I went to town. ... I wear the visor to clubs."

At clubs he gets compliments on duct tape's functionality. "If you have white pants on and you go to a club, you wrap duct tape around the bottom of them and you keep them from getting dirty and fraying."

A common fashion statement has broken out among young people, who wear duct tape. They wear it on purses, shoes, and visors not as a statement because everyone else is doing the same, but in showing their individuality.

Student Council

Student Council is currently looking for people who are interested in being either a committee chair or assistant committee chair. Our committees include Campus Improvements, External Funding, Web Team, Student Services, Parent Alumni Relations, University Relations and Intercultural Relations. Being a com-

mittee chair is a great way to get involved on campus. Not only will you meet new people, but you will have the opportunity to work with many various groups on campus. You don't need any previous Student Council experience to apply, so if you're interested in signing up for an interview or have any questions, please contact the Student Council office at 341-4280 or stucoumr@umr.edu.

Attendance

From page 13

"Attendance is necessary because that's when students learn from the wisdom of the teacher as well as how he or she explains the topic," Isaac says.

As Price points out, "A tremendous amount of material is going to be taught and a lot of learning is going to happen." Therefore, class attendance is necessary for good performance and understanding of material.

What does it say, then, when a student misses more classes than she or he attends? Senior Physics student Don Betlach sums it up pretty well. "If you find yourself not going to class, you need to think about why you took the class. Why are you in it?"

He points out that what we do in our classes today reflects what we may do in our jobs in the future. "If it's something that doesn't hold your attention now, how will it five years from now when you're doing it as a job?"

MINER ADJUSTMENTS By C. James

THE ENGLISH STUDENT BY: MARK SMELCHER

off the mark

by Mark Parisi

SNORKIN™

After years of frustration at never catching the bouquet, Aunt Sheila decides to blitz.

- 6:07 PM Jim Scott eats two bowls of chili.
- 8:24 PM Feels chest pains. Thinks it's indigestion.
- 10:13 PM Ignores family's advice to get help. Goes to bed.
- 12:53 AM Chest pain continues. Can't sleep.
- 2:41 AM Suffers heart attack.
- 3:19 AM Dies in ambulance.

Too many Americans die every year because they don't get help at the first sign of a heart attack.

If you don't seek medical help because you'll be embarrassed if it's nothing... think about how much worse it will be if you don't get help, and it's something.

If you think you have symptoms, get medical help fast.

To learn more, call 1-800-AHA-USA1, or online at <http://www.amhrt.org>.
